

# Immunoassay test report

Patient:	YODA	Species:	Feline	Patient ID:	113196
Client:	GO	Gender:	Male	Sample No.:	1
Doctor:		Age:		Time of analysis:	2026/03/12 10:12

Lab item	Current result	Ref. Ranges
fNT-proBNP	<50.0	pmol/L 0.0-100.0 

Operator:

## Report Explan.

### fNT-proBNP

#### Result indications:

0-100.0 pmol/L Normal

>100.0 pmol/L Abnormal

#### Clinical significance:

fNT-proBNP is cleaved from BNP which is produced by feline cardiomyocytes and increases with excessive stretching of the cells. fNT-proBNP concentration reflects the severity of cardiac activation after stimulation (e.g. stretching) and is the optimal biomarker for diagnosis and rule out heart failure. Used for prognostic evaluation of heart failure and therapeutic efficacy monitoring. Increase indicates an increased risk of heart failure.

Note: Due to the complexity and individuality of disease diagnosis, the report interpretation is only for your reference. Please consult your doctors for clinical diagnosis results. The results only applies to this test sample.

Test Instrument: Mindray vetXpert I3

Time of Printing: 2026-03-12 10:12:22
